Allowable Subject Matter

Claims 1-7, 9, 11-18, 23 and 37-55 are allowed. For the purpose of allowance, the original numbering of the claims has been changed.

The following is an examiner's statement of reasons for allowance:

The general concept of providing a microphone on the outer surface of a headgear unit for picking up sounds to be translated to speakers on the inside of the headgear unit was known in the art at the time of the invention, as evidenced by Landis (US 5,691,514). The general concept of using a microphone mounted adjacent to a simulated human ear or pinna for the purpose of improving the frequency characteristic of received sounds was known in the art at the time of the invention as evidenced by Kikuchi (US 4,308,426). However, the Examiner has not found prior art that teaches or suggests the modification of Landis or Kikuchi in order to provide a headgear unit comprising a pinna on the outer surface of unit, wherein the pinna approximates the shape of a human pinna, wherein the pinna has a filtering surface and serves as an analog filter to provide filtered sound to the microphone, the filtered sound being a representation of natural hearing, as defined in independent claims 11, 43. The Examiner has also not found prior art that teaches or suggests wherein the pinna on the outer surface of the headgear unit approximates the shape of an ear of a specific individual intended to wear the headgear unit, wherein the ear of the individual is measured or optically scanned to produce a replicated pinna of the users ear, as defined in independent claims 52 and 53. Other prior art has been cited herein regarding communication systems within headgear, however the other prior art of

record also fails to teach or provide suggestion to arrive the combination of the elements and steps presented in the independent claims, again when said elements or steps are collectively considered in regards to each claim. For at least the reasons listed above, the dependent claims are also allowed in view of their respective dependencies upon the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gorike et al (US 5,073,936) discloses a stereophonic microphone system.

McCracken (US 2,643,729) discloses an audio pickup device.
